Lack of Unity

1. Applicant's preliminary amendment filed May 25, 2006 is acknowledged. Claims 1-7 and 10 have been amended. Claims 9 and 11 have been canceled. Claims 12-21 have been added.

2. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

- | | |
|-----------|---|
| Group I | Claims 1-8, 12 and 21 are drawn to a method of combating <i>Streptococcus phocae</i> infection in fish comprising administering to fish a vaccine wherein the vaccine comprises bacteria of the species <i>Streptococcus phocae</i> . |
| Group II | Claim 10 is drawn to a method for the production of a vaccine for combating <i>Streptococcus phocae</i> infection comprising the mixing of a bacteria of the species <i>Streptococcus phocae</i> . |
| Group III | Claims 13-20 are drawn to a vaccine comprising bacteria of the species <i>Streptococcus phocae</i> . |

3. The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Groups I, II and III lack novelty under PCT Article 33(2) as anticipated by Henton et al (*Tydskr.S.Aft.vet.Ver.(1999) 70(2):98-99*). Henton et al teach compositions comprising the bacteria of the species *Streptococcus phocae* grown in liquid medium (page 99). The special technical feature linking the three Groups is the bacteria from the species *Streptococcus phocae*. Based on the teaching of Henton et al, the special technical feature lacks novelty, therefore the other claims are not so linked by a special technical feature within the meaning of PCT Rule 13.2 so as to form a single inventive concept. Thus, lack of unity exists.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

5. The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and the product claims are subsequently found allowable, withdrawn process claims that depend from or otherwise

Art Unit: 1645

require all the limitations of the allowable product claim will be considered for rejoinder. All claims directed to a nonelected process invention must require all the limitations of an allowable product claim for that process invention to be rejoined.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103 and 112. Until all claims to the elected product are found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowable product claim will not be rejoined. See MPEP § 821.04(b). Additionally, in order to retain the right to rejoinder in accordance with the above policy, applicant is advised that the process claims should be amended during prosecution to require the limitations of the product claims. **Failure to do so may result in a loss of the right to rejoinder.** Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.
